Core Value

Sustainability Policy

Long-term Vision 2030

FFG aims to become a financial group that creates values for all stakeholders by:
- Enhancing perception and taking actions without fear of failure,
- Pursuing high quality for future progress,
- Bolstering people's optimum choice.

To be your Bank of choice
Your closest bank   Your reliable bank   Your sophisticated bank

FFG creates a virtuous cycle of "contribution to regional economic development" and "improvement of FFG corporate value" through business activities based on the Group Management Principles in order to help develop a sustainable society.

The Best Regional Bank that contributes to the growth of all stakeholders through finance and consulting.

The Story of Fukuoka Financial Group

Fukuoka Financial Group, Inc. (FFG), was established as a financial holding company through the joint share transfer of the Bank of Fukuoka and the Kumamoto Bank on April 2, 2007. The Shinwa Bank joined into the Group in the same year and the Eighteenth Bank also integrated in 2019. Since those two banks merged on October 1, 2020, The Juhachi-Shinwa Bank was newly established.

With its headquarters in Fukuoka, the largest city in Kyushu, FFG’s network extends across the Kyushu region through bases in the three prefectures of Fukuoka, Kumamoto and Nagasaki.

All officers and employees of the Fukuoka Financial Group are united in their efforts to fulfill the promise to stakeholders to make FFG “your Bank of choice.” We look forward to your continued support in our drive to upgrade our services as a broad area-based regional financial group that spans local and global levels.

History of Fukuoka Financial Group

- **1877**: Foundation of the Bank of Fukuoka, Ltd.
- **1879**: Foundation of the Kumamoto Bank, Ltd.
- **1929**: Establishment of FFG (The Bank of Fukuoka, Ltd. and the Kumamoto Bank, Ltd.)
- **2007**: IT system integration of the Shinwa Bank, Ltd.
- **2009**: IT system integration of the Kumamoto Bank, Ltd.
- **2010**: IT system integration of the Shinwa Bank, Ltd.
Kyushu has strong relationships with Asian countries and is a market with enormous potential. We are supporting our customers by broadly strengthening our contact points throughout Japan and overseas.
My name is Hisashi Goto. I assumed the position of President of Fukuoka Financial Group, Inc. (FFG) and President of the Bank of Fukuoka, Ltd. in April 2022.

I was born and raised in Isa City, Kagoshima Prefecture, a town in the northernmost tip of the prefecture with abundant natural scenery. After graduating from high school, I came to Fukuoka, and I’ve been here for 42 years now.

In 1985, I joined the Bank of Fukuoka because of the potential for growth of Fukuoka, where I spent my university days. After joining the bank, I gained experience in four different branches and handled head office operations such as human resources, planning, and sales. When I first joined, I struggled to learn how to do my job. Since then, I have experienced various challenges as well as failures and setbacks, but I have been blessed with outstanding superiors, subordinates, and colleagues who have supported me throughout. Of course, I learned much from our customers. I would have to say that, overall, I learned more hard lessons than easy ones, but those are the sustenance of life.

My favorite book is Saburo Shiroyama’s Sukoshi-dake muri wo shite ikiru (Living life a little harder). I feel sympathy for how historical leaders who appear in that book lived their lives. There is one passage that says “Putting yourself in a situation where you live through some hardship can bring forth incredible results.” I hope to always have such an attitude as my vision, my guide to life.

There is one passage that says “Putting yourself in a situation where you live through some hardship can bring forth incredible results.” I hope to always have such an attitude as my vision, my guide to life.
Roles to be Played by Top Management

Upon assuming the position of the President, I declared three efforts inside and outside the company that I want to focus on: “being thoroughly customer-focused,” “bringing out the vitality of people and the organization,” and “continuing to increase profits.” I aim to maintain this virtuous cycle and achieve sustainable growth for FFG.

The raison d’être of a corporation is to “do good for the world.” For us, that means solving problems of our customers in the local community and contributing to the creation of a prosperous society. Of course, profits are essential to sustain such activities.

The profits that enable us to continue our business depend on the support of our customers. In order to ensure that our services satisfy our customers, we give priority to “being thoroughly customer-focused” in all aspects of our business, including sales, administration, and development of products and services.

“Being customer-focused” is the responsibility of not only our sales representatives, but of all employees, including those in charge of internal business processes and system development. It is important that each employee works energetically and that the organization is dynamically linked together, meaning it is important to “bring out the vitality of people and the organization.”

We will use the profits thus obtained to give back to local communities and shareholders, invest in new businesses, and improve the working conditions of our employees. It will create a virtuous cycle that will lead to improved productivity, customer satisfaction, and higher profits.

In addition, we will strengthen management leadership to connect the Group and employees’ goals, so that each employee can achieve self-actualization while feeling worthwhile and fulfilled by “being of assistance to others” (contributing to others).

Corporate Sustainability

Environmental Awareness

Since our establishment in 2007, we at FFG have taken on challenges ahead of other companies, such as management integration and the launch of Minna Bank, to expand our customer base and business scope, as well as to strengthen our management base including profitability and soundness. We believe that the strength of our company is that through these efforts, we have increased our presence in Kyushu, a region that has strong potential in many fields.

Over the past few years, social changes such as progress in technological innovation and increased awareness of the SDGs have been accelerated by the COVID-19 pandemic. In addition to structural issues such as population decline and aging, geopolitical risks are affecting local economies, increasing uncertainty about the future.

Long-term Vision 2030

When it was established in 2007, FFG adopted the Group Management Principles, our unchanging mission even in times of change, and the brand slogan “To be your Bank of choice” that sums up these principles. One of the Group Management Principles is “bolstering people’s optimum choice,” and this can be rephrased as “FFG exists to think and deliberate with our customers and partners to support them in making the best choices,” which is FFG’s raison d’être, our purpose.

Since the establishment of FFG, our business environment has changed significantly. Our raison d’être, however, is unchangingly to “bolster people’s optimum choice” and contribute to the creation of prosperous society.

Based on these management principles, we formulated our “Long-term Vision 2030: To be the best regional bank that contributes to the growth of all stakeholders through finance and consulting” looking toward the year 2030.

The future we aim to realize by 2030 is a society that is economically, materially, and spiritually richer. This is also the goal of the SDGs, which is intended to harmonize the environment, society, and economy. Aiming to achieve such a society, we help solve various problems while improving our service development capabilities, solution capabilities, and organizational capabilities. We practice “FFG sustainability management,” which will lead to the creation of a virtuous cycle of contribution to the local community, FFG’s growth, and the growth of our employees.
< The 7th Mid-Term Management Plan and business growth >

2030, the target year of our long-term vision, is seven and a half years away. In our 7th Mid-Term Management Plan, which started in FY2022 as a successor to our 6th Mid-Term Management Plan, we are focusing on four priority initiatives based on profit growth through core businesses: sales reforms, second business reforms, strengthening strategic subsidiaries, and taking on the challenge of new businesses.

The measures implemented in the 6th Mid-Term Management Plan, along with their results, will be utilized in the measures of the 7th Mid-Term Management Plan. “Business reforms” will lead to “second business reforms,” which aims for the digitalization of procedures and promotion of administrative reform. Likewise, the system and training of specialists cultivated through the “Investment Trusts Palette” will lead to “sales reforms,” and the various know-how acquired in advance by “Minna Bank” will lead to “digital transformation (DX)” for the entire FFG.

In the 7th Mid-Term Management Plan, we will link these measures with “DX” as the starting point to create synergy. Through a “goal-based approach,” in which we work side by side with each customer toward their goals (company management principles and goals, personal dreams), we will establish a truly customer-focused business and pass it on to the 8th Mid-Term Management Plan and beyond, which cover the next five-year period.

We will enhance our business expertise through “DX” and the “goal-based approach” in the 7th Mid-Term Management Plan and expand the scope of our operations by growing new businesses, forming alliances with companies in other industries, and strengthening strategic subsidiaries. By enhancing our expertise and expanding our scope of business, expansion of our customer base can be expected.

Working toward 2030, we will advance and expand the three dimensions of “technology and expertise” (“vertical axis”), “breadth of business” (“horizontal axis”), and “customer base” (“depth”). We also aim to realize our long-term vision by dramatically growing our business through those synergies.

< Collaborating on measures based on DX >

FFG aims to be a new model of the ideal bank that seamlessly connects digital and human services and is closer to customers than ever before. However, we believe that digital technology is a prerequisite for bank operations, as well as customers’ businesses and lifestyles, and that the ultimate point of contact with customers should be the human touch.
By transforming our people, organizations, and business processes using digital technology, we will change the behavior of our staff and provide value that exceeds customer expectations. This is a true “customer-focused” approach, which leads to sustainable growth through improved earnings. It creates a virtuous cycle that contributes to the creation of a prosperous society for both our customers and communities. The process leading up to realization of this cycle is FFG's “DX.”

Using the smartphone app that we currently have in development, customers will be able to smoothly complete general transactions such as opening accounts or changing their addresses, anytime, anywhere. We will digitalize not only customer transaction channels, but also many business processes, such as product and service development, in order to improve productivity.

In addition, we will build an SFA (sales force automation) system in order to use data accumulated from both real and digital channels for sales activities and guidance to customers. We will work toward reforming our sales style so that we can use this SFA to help solve latent problems that customers may not have noticed.

The new SFA system also converts the personal knowledge, know-how, and sensibilities of the staff in charge into explicit knowledge and shares it within the organization. This develops and homogenizes the skills of sales representatives and makes it possible to do more specialized and custom-made consulting.

The shift to digital channels for day-to-day transactions will improve operational efficiency, allowing employees to shift to more specialized and productive work. Along with reviewing the way our branches should be operated and our sales system, we will also increase the frequency and duration of contact with customers, which will make for deeper relationships with customers.

In addition, by utilizing digital technology, we will facilitate communication within FFG and create an environment where each employee can work efficiently and actively.

In brief, the 7th Mid-Term Management Plan is “transformation of the FFG’s business model, starting with DX.” To that end, we will promote the creation of an organization in which each individual employee can share their goals and objectives, and feel that they are of assistance to customers and local communities, contributing to FFG’s growth.

In the age of VUCA (volatility, uncertainty, complexity, and ambiguity), our leaders should play the role of “servant leadership,” which indicates the direction the organization aims to take, draws out the capabilities of individuals, and supports proactive activities. From this perspective, we place importance on an organizational culture that fosters “psychological safety.” It is important for everyone to express their opinion, not only in risk management but also when taking on new challenges. This enables us to avoid various business risks. Furthermore, it increases our chances of sharing fresh ideas that will lead to business growth and innovation.

In addition, we promote diversity, equity, and inclusion (DE&I) initiatives that aim for “employee autonomy and self-reliance.” In order to make our way forward in an era of uncertainty, it is required for us to bring out the strengths of individuals with diverse backgrounds. While advancing the active participation of women and strengthen mid-career recruitment, we are also developing a variety of career paths, such as a specialist course and a challenge system to develop next-generation managers.

We will actively invest in human resources through recruitment, development, placement, evaluation, and treatment of the diverse human resources who will support our future business and build a “strategic human resource portfolio.”

* “A climate in which people are comfortable expressing and being themselves” (excerpt from The Fearless Organization by Amy C. Edmonson)
**Response to Environmental Issues**

In order to contribute to realizing a sustainable society, FFG has established a “Sustainability Policy” in 2020 and has set “environmental protection” as one of its focus items (materiality). We recognize that responding to climate change is an important management strategy issue, and we are actively responding by setting goals for sustainable finance (an accumulated amount of 2 trillion yen by FY2030 (including 1 trillion yen in environmental finance)), and conducting scenario analysis of climate-related risks such as “transition risk” and “physical risk.”

As for our carbon-neutral goal, in May of this year we set a goal of net zero CO2 emissions from FFG by FY2030. By committing ourselves to carbon neutrality, we will work together as a group to support the efforts of local customers to transition to a decarbonized society and to support innovative technologies.

In our efforts, we will maximize the use of the functions of Sustainable Scale, Inc., our SDGs support subsidiary established in April 2021. Specifically, we visualize the issues of our customers through dialogue using the “Sustainable Scale Index,” an index that measures ESG/SDGs initiatives, and provides various solutions for issues such as finance and business matching, helping to improve the region’s sustainability.

---

**Capital Strategy and Shareholder Returns**

FFG conducts capital management while taking into account the balance between shareholder returns and growth investments aimed at the development of local communities and the enhancement of FFG’s corporate value, based on the premise of maintaining soundness of the company.

In our current Mid-Term Management Plan, we have set a capital adequacy ratio target at around 15% (on a regulation-finalized, fully applied basis) as our guideline for capital management. Our current ratio is around 10%, so during the period of the current Mid-Term Management Plan, we plan to allocate profits in a well-balanced manner between growth investments and shareholder returns over the next three years.

With regard to shareholder returns, our basic policy for stable dividends (either maintained or increased) through profit growth remains unchanged. Our basic dividend payout ratio will continue to be around 35%. In FY2022, we plan to increase the dividend by 10 yen from the previous fiscal year to 105 yen (an increase of 70 yen compared to when FFG was established).

In FY2022, we acquired our own shares for the first time since the establishment of FFG. Going forward, we will continue to flexibly consider acquisition of our own shares while taking into account performance trends, our capital situation, growth investment opportunities, the market environment, and so on.

We have set a target for ROE in the current Mid-Term Management Plan at around 6%. We will strive to improve ROE over the medium to long term by making growth investments that will lead to improved profitability, such as investments in the priority initiatives of the current Mid-Term Management Plan, and steadily capturing the effects of those investments. Although the current business environment is becoming increasingly severe due to various risk factors, we will continue to aim for sustainable growth and increased corporate value through quality and constructive dialogue with our stakeholders and proactive disclosure of financial and non-financial information.

---

*Sustainability P. 30
Communication with Stakeholders P. 61*
As a financial group rooted in the local community, FFG has provided the original functions of a bank, such as financial intermediation, credit creation, and settlement. At the same time, we have boldly taken on the challenge of new businesses in anticipation of changes in the times and customer needs. The trust and credibility that we have built up in this way from the local community are our greatest assets.

Today, the banking industry is facing a harsh competitive environment as various players enter the business along with advances in technological innovation. On the other hand, the robust nature of Japan’s uniquely evolved banking system and the Japanese mentality of placing importance on trust and credibility will not change significantly. Therefore, I believe that the enhancement of our
capital adequacy ratio target at around 15% (on a regulation-finalized, fully applied basis) and a current ratio is around 10%, so during the period of the current Mid-Term Management Plan, we plan to allocate profits in a well-balanced manner between growth investments and shareholder returns and growth investments aimed at the enhancement of FFG’s corporate value.

In the premise of maintaining soundness of the business environment is becoming increasingly severe due to various risk factors, we will continue our carbon-neutral goal, in May of this year we set a goal of net zero CO₂ emissions from FFG by FY2030. By committing ourselves to innovative technologies.

We have set a target for ROE in the current Mid-Term Management Plan at around 6%. We will strive to improve ROE over the medium to long term by making growth investments that will lead to improved profitability, such as investments in the acquisition of our own shares while taking into account the balance between shareholder returns and growth investments aimed at the development of local communities and the society. For our carbon-neutral goal, the region’s sustainability.

FFG conducts capital management while taking “physical risk” and “risk” as one of its focus items (materiality). The desire to “be of assistance to others” is universal among all FFG employees. I myself intend to lead FFG and pave the way forward in this era with an uncertain future, following FFG’s unwavering “ambition” and the brand slogan, “To be your Bank of choice.”

I humbly request your continued support as we aim to create a better future in 2030.

Hisashi Goto
Director & President
Fukuoka Financial Group, Inc.

The true face of top management

My hobbies are listening to music (including a wide range of Japanese and foreign music) and playing a musical instrument (drums). I started playing the drums when I was a university student. I am taking a break now, but would like to play again if I have the opportunity. I also enjoy novels because they offer vicarious experiences of life, so I read books by various authors. I enjoy stories by Jiro Asada, who is known for the novel Poppoya (The Stationmaster), and I am impressed by the ways of life of historical leaders who always took on new challenges.
Kyushu is an important base of production in Japan for the cars, integrated circuits (IC), agriculture and food industries.

Northern Kyushu, a center of “Car Island”
is an important car-producing region with accumulated factory base of domestic manufacturers such as Toyota, Nissan and Daihatsu.

Middle Kyushu, contributes to “Silicon Island”
is home to a flourishing semiconductor industry, facilitated by its high-quality water sources, abundant workforce and well-developed infrastructure of roads and ports.

Southern Kyushu, a center of “Food Island”
produces foods with brand power such as Miyazaki beef and Kagoshima black pork.

What is Kyushu?

Kyushu is located in the south westernmost area of Japan. It is bordered by the East China Sea to the west and the Pacific Ocean to the east. The climate is slightly warmer and more tropical than Honshu, mainland of Japan. The region has rich nature, multiple World Heritage sites, and a robust tourism industry. In Fukuoka Prefecture, where the headquarters of FFG is located, new seeds for growth are sprouting, characterized by large-scale redevelopment that takes advantage of the National Strategic Special Zone and active start-up support through public-private collaboration.

Convenient Transport Hub

Since various means of transportation of land, sea, and air are concentrated in central Fukuoka, it has taken the role of a hub which connects the flow of people, goods, money and information with each prefecture in Kyushu.

A New Wave in the Regional Economy

Fukuoka, a Global Start up City

Fukuoka City offers substantial support, including preferential tax treatment and subsidies, to start-up companies. At Fukuoka Growth Next, a next-generation start-up support facility, Fukuoka City and local companies work together to offer development programs, collaborate with global accelerators, and create financing opportunities. As part of the Startup Hub City Project, Fukuoka City has been selected as a Global Startup City and Kitakyushu City as a Startup City, which indicates an accelerating trend to support start-ups in various areas.

Impact on expansion of TSMC in Kumamoto

TSMC, the world’s largest commissioned production, built a new factory in Kikuyo-cho, Kumamoto prefecture. Demand for funds has increased across a wide range of industries, including real estate, semiconductors, logistics, and commercial facilities.

Strengths of FFG

Corporate culture without fear of failure

FFG’s strengths are its creative and challenging corporate culture and its ability to make decisions that allows such culture. FFG has been one of the first banks to take action in several areas, such as parting with non-performing loans after the bursting of the asset bubble, management integration utilizing such know-how, and initiatives in new fields with an eye on the future. By actively taking on the challenge of unprecedented strategic options, we have developed a sound awareness of risk, enhanced perception, and the ability to take action without fear of failure.

Sophisticated and diverse human resources

We have developed human resources with high levels of expertise and diverse skills through the execution of various strategic options. Above all, the source of FFG’s competitiveness is its assessment and problem-solving abilities for the industry cultivated through business revitalization.

Through human resource exchanges beyond boundaries of banks and fields, we have worked to integrate cultures and sophisticate skills. We are also actively investing in the development of specialist human resources in order to meet the changing needs of our customers. We have established a system and an environment in which diverse human resources can play active roles regardless of gender or age.

Solid business base

For the three years after the establishment of the Group, we worked on customer-centered sales after developing the management infrastructure and improving our balance sheet. We focus on understanding the needs and solving problems of our corporate customers. For retail customers, we offer a strong lineup of products and highly convenient services. In this manner, we have earned strong support from our customers, thereby dramatically expanding our sales base. Today, our sales base is top class among regional banks.
Single Platform/Multiple Brands

We maintain the brands of each bank that have been well-loved and trusted by local communities throughout their long history, and at the same time, we have established a “Single Platform/Multiple Brands” that standardizes the business administration and IT systems as well as products and services. Our unique management style is optimally suited to business integration between regional banks to facilitate the pursuit of economies of scale and efficiency. Minna Bank, the first digital bank in Japan, provides unique services nationwide under the governance and risk management of FFG.

Broad yet close-knit network

FFG’s mother markets are Fukuoka, Kumamoto, and Nagasaki, which together account for roughly 60% of Kyushu’s economy. We are a “broad-area based regional financial group” that seamlessly covers the entire area with three regional banks, and we also have a network outside of Kyushu. We have established eight overseas offices, mainly in Asia, which is geographically close and has active economic exchange with Japan. We have also built a support system that can respond to the needs of customers overseas.

Group total power

FFG is a comprehensive financial service group with 22 affiliated companies in total. We are capable of addressing all the needs of our customers, from securities, insurance, and consulting, to marketing, lease and venture support. Few financial groups are capable of performing this many functions, and our ability to provide advanced solutions that make the most of the power of our organization is one of FFG’s unique strengths. Strengthening subsidiaries is a pillar of our strategy, and we have established several new companies in the past few years. We are building a Group-wide operating system that includes banks and affiliated companies.
Following our Sustainability Policy, FFG will utilize the strengths (financial capital and non-financial capital) and technological innovation that we have cultivated so far to conduct business activities (providing value to stakeholders). We believe it will contribute to the realization of economically, materially, and spiritually rich and sustainable local communities. FFG's sustainability management is to create a virtuous cycle of “contribution to regional economic development,” “growth of FFG,” and “individual (employee) growth,” aimed at the realization of a prosperous society as targeted in Long-term Vision 2030.

**Long-term Vision 2030**
The best regional bank contributing to the growth of all stakeholders

### Input

- **Our strengths**
  - **Human capital**
    - Number of employees: 7,830
    - Number of mid-career recruitment: 164 (FY2019–FY2021)
    - Digital human resources: 299
    - Diverse and flexible work styles
  - **Intellectual capital**
    - Strong presence in the community
    - Management integration/PMI know-how service
    - System development capabilities (ex. Minna Bank)
    - Providing the Sustainable Scale Index*1
  - **Financial capital**
    - Total deposits: 20.5 trillion yen
    - Total loans: 16.7 trillion yen
    - Allowance for loan losses: 199.3 billion yen
    - Growth investment: 120.0 billion yen (FY2022–FY2024)
  - **Social/related capital**
    - Corporate banking customers: Approximately 280,000
    - Retail banking customers: Approximately 6.55 million
    - Wallet+ affiliated banks*: 12 banks
    - Venture investment total*: 22.0 billion yen

### Business activities

- **Initiatives for priority issues (materiality) of local communities**
  - Sound growth of regional economy
  - Industrial growth and financial innovation
  - Response to aging population and declining birth rate
  - Environmental protection
  - Realization of prosperous society
  - Diversity, equity & inclusion
  - Enhancement of governance

### External environment

- **ESG/SDGs**
- **Digitalization**
- **Diversification of values**
- **Deregulation**
- **Shrinking/aging population**

### The 7th Mid-Term Management Plan

- **Priority initiative I:** Sales reforms
- **Priority initiative II:** Second business reforms
- **Priority initiative III:** Strengthening strategic subsidiaries
- **Priority initiative IV:** Taking on the challenge of new businesses

**Core business growth**

- System development/in-house production
- Human resources strategy

**Governance/Compliance/Risk Management**

Sustainability Policy: Creating a virtuous cycle of “contribution to regional economic development”

---

*1 An indicator that measures the status of customers’ initiatives related to ESG/SDGs  
*2 The banks which concluded formal agreement on participation in the iBank business
sustainable local communities. FFG’s sustainability management is to create a virtuous cycle of “contribution to community growth,” “growth of FFG,” and “individual (employee) growth,” aimed at the realization of a prosperous society as targeted in Long-term Vision 2030.

The sustainable society we aim to create

Economically, materially, and spiritually enriched society
A society where everyone can do what they really want to do, without anxiety regarding the future
A society where everyone’s individuality works together and everyone feels like a member of society

FFG sustainability management

- Growth of FFG
- Contribution to regional growth
- Realization of prosperous society
- Growth of individuals (employees)

### Social value (by FY2030)
- Cumulative executed amount of sustainable financing: 2 trillion yen
- Financial and economic education participants: 100,000

### Environmental value (by FY2030)
- Net zero in-house CO₂ emissions

### Economic value (FY2024)
- Net income: 65.0 billion yen
- Capital adequacy ratio: Around 15%
- ROE: Around 6%
- OHR: Around 60%

The 7th Mid-Term Management Plan

Under the 6th Mid-Term Management Plan, which started in 2019, we worked on business reforms, the merger of Juhachi-Shinwa Bank, and the reform of the investment trust business. At the same time, we also started business in new areas such as the opening of Minna Bank and SDGs support.

From April 2022, we started the Long-Term Vision 2030 and the 7th Mid-Term Management Plan. Using the initiatives of the previous Mid-term Management Plan, we will further strengthen and grow our core businesses such as the corporate and retail sales departments and the market department. Furthermore, based on the earnings and know-how obtained from such growth, we will steadily accomplish four initiatives as priority initiatives (growth investments) for the future: sales reforms, second business reforms, strengthening strategic subsidiaries, which is to enhance the solution capabilities of FFG as a whole, and taking on the challenge of new businesses, such as Minna Bank.

In order to execute these initiatives, we will further accelerate our DX strategy and efficiently and effectively utilize data obtained by expanding customer contact points.

### Long-term Vision 2030

**3 core strengths**

1. **Service development capabilities** to respond to diversifying customer needs without stress based on trust
2. **Solutions capability** to solve corporate and social issues
3. **Organizational strength** to flexibly respond to drastically changing environmental and social issues and work styles

### 7th Medium-Term Management Plan

**Period of the plan**

April 2022 to March 2025

**Basic strategy**

Based on the profit growth of existing businesses, the three-year period will be used to quickly realize the effects of new growth investments (priority initiatives) by realizing the effects of the Sixth Medium-Term Management Plan’s projects.

**Growth of existing businesses**

**Priority Initiatives**

1. **Reform in Sales Division**
2. **DX Strategy**
3. **Strengthening of strategic subsidiaries**
4. **Challenges to new businesses**

Priority Initiatives

Sales Division

We strive to build a business model centered on fees, that does not focus on loans, through consulting that brings together the collective strengths of the Group. What the group has been focusing on is the growth of profits from existing businesses by embodying the Project effect of the 6th Medium-Term Management Plan (increasing corporate / individual fees, improving operational efficiency).

Corporate businesses

Goal-based marketing approach to support the main businesses of “Corporate customers”

- Implementation of the main business support (providing complex solutions)
  - Business succession, SDGs (decarbonization), digitization support
- Development of district strategies
  - Expanding transactions with core regional companies
  - Diversification of risk-taking in investment banking businesses
  - M&A and mezzanine/equity finance

Consumer businesses

“Life-time companion” who realizes a prosperous future with goal-based total life consulting

- Ongoing approach of age group specific marketing and accompanying marketing.
  - Strengthening of proposals centered on “asset management Palette” and “FFG Accumulation Plan”
  - Strengthening of proposals centered on security insurance
- Restructuring of marketing organization
  - To build an efficient system for a small number of elites to improve profitability

Strengthening of strategic subsidiaries

We work on expanding the business domain of our strategic subsidiaries in order to enhance the group’s solution capabilities and organizational strength. Through the utilization of the bank’s customer base, FFG’s network and alliances, we will expand the customer base and business profits of our strategic subsidiaries.

Changes in contact points through channel reform

We aim at reduction of OTC business volume by establishing a core digital channel, making “all the transactions other than the physical transactions available through the digital channel” while promoting digitization of transactions and administrative reforms at the same time.

Effect (reduction of work volume)

8 strategic subsidiaries

Outline of Measures

Expansion of digital channels

Administrative Process improvement

Transactions that cannot be transferred to digital channels for the time being, such as physical transactions, will be streamlined by consolidating the administrative operations.

Effect (reduction of work volume)

FY2024: OTC business volume -50%
FFG’s DX strategy aims to transform the very way of doing banking business and create new business value. In the 7th Medium-Term Management Plan, we will set operational reforms and sales reforms as the main scope of initiatives, and promote the DX of consumer/corporate businesses. We will also promote the DX of the organization, human resources, and culture in order to realize these transformations. We will work on constructing an overall optimized architecture that supports these transformations from a systems aspect.

Priority Initiatives

DX Strategy

We will renew our banking apps for retail customers and transform ourselves to also be the Bank of choice in the digital world.

- **consumer business**
  - We will renew our banking apps for retail customers and transform ourselves to also be the Bank of choice in the digital world.

- **corporate business**
  - We will develop a portal site for corporate customers and review the SFA to deepen customer understanding through digital and human resources and strengthen sales.
Minna Bank

Minna Bank, which began providing services on May 28, 2021, exceeded 1,080 thousand app downloads and 400 thousand number of accounts in a year. Approximately 70% of all our customers are in their teens to thirties, and the coverage area is spreading nationwide, as we are proceeding in the direction that matches the target. As Japan’s first digital bank, we stably operate our bank accounting system on a public cloud, and have succeeded at in-house production from service development to maintenance and operation. As a result, we are experimenting with various new marketing techniques. The member composition combined with system subsidiary Zero Bank Design Factory is 35% seconded from FFG subsidiary banks and 65% specialist mid-career hires.

Overview of Minna Bank

<table>
<thead>
<tr>
<th>Mission</th>
<th>Deliver valuable connections to everyone</th>
</tr>
</thead>
<tbody>
<tr>
<td>Target</td>
<td>To provide minimalist financial services that cater to the sensibilities, behaviors, and needs of digital natives (a collective term for Millennials and Generation Z) who have grown up with the internet and smartphones since childhood.</td>
</tr>
</tbody>
</table>
| Service concepts | 1) Transform everyone’s voice into reality  
- New financial services aligned with evolving customer behaviors  
2) Deliver the best to everyone  
- Comprehensive financial concierge based on customer understanding  
3) Integrate into everyone’s lives  
- Banking as a Service (BaaS) business |
| Business domains | 1) B2C services: Providing financial services to Japan’s digital natives with a next-generation banking system  
2) B2B2X services: Providing the financial functions of a digital bank to partner companies via an API  
3) IP monetization: continue to develop banking functionality and license the IP externally |

Re-Design phase and Re-Define phase

Minna Bank has positioned the three years from April 2022 as its 1st Mid-Term Management Plan. The bank will further refine UI and UX, with which they have been taking the initiative on, and will start a full-fledged phase of redefining finance to create new services. In July 2022, the bank released a frictionless and personalized loan product as its pillar of revenue. Minna Bank will create the services that meet the next needs of people and develop them as a BaaS business in the future. By doing so, the bank will take challenges to engage in business with corporate customers nationwide in addition to retail customers, so that our corporate customers can also experience its new financial services.

The results (as of December 31, 2022)

- Cumulative downloads: 880 thousand downloads
- Number of accounts: 330 thousand accounts
- User attributes
DE&I

We at FFG are working to promote Diversity, Equity & Inclusion (DE&I) in order to bring out the vitality of people and the organization.

Initiative Policy

In order to capitalize on the individuality of our employees (diversity) and go beyond just having diverse employees (equity), we must do appropriate and fair management and support that takes into account the various backgrounds of our employees (equity). In particular, for female employees who are greatly affected by life events such as marriage and childbirth, FFG declared its own targets for the promotion of women to management positions of its own accord, even before the Act on Promotion of Women’s Participation and Advancement in the Workplace was enacted. We have been focusing our efforts on supporting women in advancing their career and establishing an environment to allow them to balance work and life. As a result, the percentage of women in management positions is gradually growing, and their field of activity is expanding.

We will continue to treat DE&I as “a way of thinking that forms the basis of all management strategies,” and will create environments where each individual can achieve their desired career, keeping in mind that “each employee is their own person.” In addition, we will further promote the active participation of women with a view to cultivating women as top leaders. FFG’s initiative policy for DE&I is to respect and integrate the diversity of “knowledge and experience” of employees with various experiences and backgrounds, and to connect this to the growth of the organization.

Promotion of DE&I

“Equity” connects diversity with inclusion. This means “giving each employee appropriate management and support individually (= equally),” based on the premise that not everyone is standing on the same starting line, so that everyone can play an active role. It is a way of thinking that draws a line from “equality,” which merely gives everyone the same support uniformly.

Equity is based on the ability to imagine the difficulties that people with diverse backgrounds may have, and the compassion for those who are in a different position than oneself. In order to know “what is appropriate” for each person, it is important to hold “dialogues” by facing each person resolutely and searching for answers together, while gaining a deeper understanding of each other.

FFG is implementing dynamic measures such as training next-generation leaders and highly specialized human resources. At the same time, we have continued steady efforts centered on the idea of DE&I, such as “one-on-one meetings” between superiors and subordinates, and “round-table discussions for young bank employees” in each region through the “Fuwari” project. By fostering a culture of caring for others and promoting mutual communication among employees, we will strive to foster an organizational culture of respecting and utilizing individual differences, as well as supporting and uplifting each other.

History of diversity promotion

- October 2013  
  Launch of “Support for Women Project: Fuwari”
  This project was launched by a team of 13 female employees in different positions conducting different operations. The team proposes reforms from the perspectives of systems and awareness, reflecting feedback and ideas obtained from workplaces. It also plans and runs a variety of events. “Sub-Fuwari” members are also appointed to the different sales areas to look after activities in those areas. These members serve as a bridge between workplaces and headquarters by gathering feedback from workplaces and conveying policies and messages from headquarters to the workplaces in accessible ways. Since the project was first launched, old members have moved on and new members have taken their place, carrying on the initiatives and intentions of their predecessors and continuing the project’s activities. Even while their activities were curtailed during the COVID-19 pandemic, they have made effective use of social media and online meetings to keep up their efforts.
  -As of September 30, 2022, a total of 372 members (total for three banks) have participated.

- FY2013  
  Began various training workshops for female employees
  - Loan workshops for women (held 59 times for a total of 1,352 attendees)
  - Career workshops for women (held 28 times for a total of 682 attendees)
History of diversity promotion

Equity & Inclusion (DE&I) in order to bring out the vitality and establishing an environment to allow them to balance Promotion of Women’s Participation and Advancement in positions of its own accord, even before the Act on such as marriage and childbirth, FFG declared its own backgrounds of our employees (equity). In particular, for (inclusion) and go beyond just having diverse employees Initiative Policy

A Fuwari meeting to FFG’s officers

Management Strategies

For an organization in which anyone can experience job satisfaction

— October 2014
Announcement of targets for promotion of women

— April 2015
Establishment of new Diversity Promotion Office
Restructured into the FFG Diversity Promotion Group in April 2016 to cover the entire group

— FY2016
Strengthening of work-life balance support systems

• Support program for returning to work
This is FFG’s original program to support the smooth return to work of female employees after childbirth or childcare leave. Interviews and training corresponding to all stages, from pregnancy discovery to returning to work, are consistently conducted by the Diversity Promotion Group. A work-life balance hotline to respond to questions and concerns has also been established.

• Joined Ikuboss
Corporate Alliance

Strengthening of management development

• Joint Ikuboss Seminars by the three banks
FFG is concentrating its efforts on the improvement of supervisors’ management capabilities to ensure that each and every employee can make the most of their individuality and realize their full potential. Over the past 7 years, 11 seminars have been held, targeting not only people currently in management positions, but also younger employees who will be managers in the future.

— April 2018
Established daycare center inside the company

— October 2018
Launch of “Men’s Fuwari”
Male employees who are close to promotion to managerial positions were invited to join this project, with the expectation of proposals from the male perspective and the strengthening of future management. So far, 58 employees from the three banks have participated in the project. They have deepened their understanding of female employees, who have to change the way they work in accordance with life events, and thought about the creation of workplaces in which anybody can experience job satisfaction.

— February 2019
Began promotion of childcare leave for men

— FY2019
Full-fledged recruitment of digital specialists at FFG

— July 2020
Creation of Diversity (Fuwari) website on IntraTop
The creation of this new website provides easier access to necessary information, by posting the work-life balance support handbook to help employees balance work and childcare or nursing and articles about role models who are actively participating.

— FY2021
Upgrading loan workshops for women

— June 2021
Launch of mentor system

— November 2021
Launch of LGBTQ seminars for all employees

— April 2022
Changed name to DE&I Promotion Group
FFG changed the name of the Diversity Promotion Group to the “DE&I Promotion Group,” with the aim of implementing measures that focus on individual differences.

— October 2022
Mandated childcare leave of 10 working days for male employees / Established multi-purpose leave system
Setting long-term KPIs
FFG set the ratio of human resources with diverse backgrounds (women, mid-career hires, etc.) in personnel with titled positions to 35% or more by the end of FY2030

Sustainability

Sustainability Policy

FFG creates a virtuous cycle of "contribution to regional economic development" and "improvement of FFG corporate value" through business activities based on the Group Management Principles in order to help develop a sustainable society.

1. Contributing to the realization of sustainability through financial services
   We have developed products meeting SDGs needs of corporate and individual customers.

2. Realizing customer's sustainability together
   Sustainable Scale, Inc., a subsidiary for supporting SDGs, has developed a scoring model for evaluating sustainability-related initiatives of customers, proceeding with external cooperation.

3. Contributing to the sustainability of local communities
   Based on networks and close relationships with local communities we have built as a local financial institution, FFG has worked on the revitalization of communities that only FFG can realize by connecting lands and people.

4. Promoting sustainability of FFG
   Positioning efforts for addressing climate change as an important element of its business strategy, FFG has supported the TCFD.

Materiality

Focus Items

- Sound growth of regional economy
- Industrial growth and financial innovation
- Response to aging population and declining birth rate
- Environmental protection
- Realization of prosperous local communities
- DE&I
- Enhancement of governance

FFG has identified its focus items to contribute to the achievement of SDGs, considering their impact on the achievement of the Long-term Vision and the opinions of its stakeholders.

Contributing to the realization of sustainability through financial services

FFG's sustainability-related products

With an eye to contributing to the creation of sustainable society as a local financial group, FFG offers sustainability-related products and services focusing on "long-term asset building" in the era of the 100-year lifespan and "respect for diversity," which would allow anybody to live with peace of mind as being themselves.

The Group has handled SDGs private placement bonds at each group bank since 2019 in order to provide companies and organizations working on SDGs opportunities to have a contact point with each other. From the fiscal year ending March 31, 2022, FFG also started handling new donation-type foreign currency time deposits, investment trusts in the ESG field, and prepaid cards exclusively for foreign residents, and introduced housing loans responding to the needs of LGBT to help develop comfortable communities.

In November 2021, the Group started handling the "Sustainable Scale Index," an ESG and SDGs scoring model, for the purpose of supporting corporate customers’ activities to achieve SDGs (for more details, please see P. 32). Furthermore, in August 2022, we added two new types of sustainable finance products for corporate customers to our product lineup. Taking this service and financing as the starting point, we are aiming to increase opportunities to talk with customers and lead them to deeper understanding also from the viewpoint of SDGs.

## Sustainability

### Realizing customer's sustainability together

FFG develops “Sustainable Scale, Inc.”, a subsidiary for supporting SDGs. Its purpose is to encourage the creation and growth of local communities, which sustainably grow through SDGs activities and companies that support such communities as a bridge between them. With an eye to contributing to the sound growth of local communities, we promote initiatives toward the realization of management transformation focusing on the sustainability of local communities and companies, so-called “Sustainability Transformation (SX).”

Sustainable Scale evaluates activities for the achievement of SDGs by local communities and companies, and makes them quantitatively visible, with Dr. Shunsuke Managi, Distinguished Professor at Kyushu University and representative of UN's Inclusive Wealth Report assigned to a position of director.

With FFG and Kyushu University as axes, it provides advice and expertise toward “Sustainability Transformation (SX),” in cooperation with experts with knowledge in various fields.

### Support for SDGs with the introduction of a scoring model

#### Supporting the introduction of SDGs

**SDGs Scoring Model Service “Sustainable Scale Index”**

- Your own activities for SDGs can be indexed and visible by answering about 200 evaluation items.
- As evaluated by industry, it is possible to know your present position by comparing an industrial average and your own value.

#### Using this service

- Able to know key points for achieving SDGs through answering questions.
- Your own entire business can be carefully examined from the viewpoint of SDGs, which would lead to the understanding of SDGs.

**Supporting the introduction of SDGs**

- **POINT 1** Providing indexes usable for community people
  As there are fewer index data on activities for ESG and SDGs of unlisted companies than listed companies, FFG builds a scoring model for both listed and unlisted companies and provides indexes usable for various customers.

- **POINT 2** Establishing a unique evaluation system jointly with Kyushu University
  The unique SDGs evaluation model is provided, which was developed jointly by FFG’s subsidiary Sustainable Scale, Inc. and Kyushu University.

Based on an evaluation report of this service, we increase opportunities for talks between bank personnel and local companies, taking up a variety of matters as themes in terms of SDGs, to lead to support toward continuous growth of local companies.
We offer a step-by-step support menu to assist our customers in their sustainability activities

SSI is being utilized!

Support for company evaluation under the Kitakyushu City SDG-X Leading Project Subsidy
The Fukuoka Bank has signed an outsourcing contract for the public solicitation of the Kitakyushu City SDG-X Leading Project. The Sustainable Scale Index is used as a tool to index and visualize the company’s sustainability activities in the evaluation of SDGs management, one of the criteria for the adoption of this project. In order to revitalize the local economy through efforts driven by the SDGs, this initiative provides financial support to companies that practice excellent SDGs management and make progressive efforts to simultaneously achieve the growth of local companies and solutions to social issues.

Supporting corporate customers in their decarbonization initiatives -Collaboration agreement with Zeroboard Inc.-
The results of the Sustainable Scale Index indicate growing interest in environmental issues, particularly those related to decarbonization. In response to increasing requests from upstream companies in the supply chain to disclose GHG (greenhouse gas) emissions, FFG has concluded a business matching agreement with Zeroboard Inc. and introduced a GHG emissions calculation service. We support corporate customers in their efforts to decarbonize their businesses, starting with the visualization of emissions.
Sustainability

3 Contributing to the Sustainability of Local Communities

The Fukuoka Financial Group will strive to address the needs and challenges faced by local governments, companies, schools, entrepreneurs, and producers in Kyushu and fulfill the role expected of us as a leader to activate the community. By combining the strengths of our broad yet close-knit network and solid customer base, we will be able to bring about new innovations. We are working to activate the local economy with a mid- to long-term perspective that transcends the category of financial business, and we are confident that we can accomplish it thanks to our long-standing roots in the community.

FFG’s integrated group strengths for regional revitalization

FFG is strengthening its support structure to ensure that the Group as a whole can fulfill the role expected of a regional financial institution.

Currently, based on Japan’s Vision for a Digital Garden City Nation, each local government is constructing the regional image it should aim for, and revising its local version of the comprehensive strategy to implementing specific initiatives to solve local social issues by leveraging the power of digital technology. FFG is currently working to support the core business of local companies by supporting the formation of consortiums, in which local communities can take the initiative based on their own characteristics and circumstances.

Creation of a flow of people to local regions

In the field of tourism, in Itoshima City, Fukuoka Prefecture, we supported the implementation of a health tourism monitoring tour in cooperation with a local university and the trial operation of a bus tour, with the aim of increasing the time spent in the city and expanding secondary transportation, which are the challenges faced by the city.

In Iki City, Nagasaki Prefecture, we implemented the Iki SDGs Co-creation Camp as an initiative to create a flow of people from urban areas to the local regions. We communicated the acceptance infrastructure of the region as an advanced teleworking and workcation location, the advanced nature of the SDGs, and the attractiveness of living in the local area, leading to the expansion of local exchange and the creation of a connected mind.

Support for expansion of sales channels for local products

The online store en-nichi held the Midsummer Day of the Ox Special Orders 2022 featuring eight famous eel stores in Fukuoka and Kumamoto. We supported the core businesses of corporate customers by offering a wide variety of early discount products and limited-time-only sets, such as kabayaki, shirayaki, and seironmushi.

We also continue to hold our conventional business meetings even during the COVID-19 pandemic. In FY2021, we held online product business meetings in cooperation with Kumamoto City, providing a venue and opportunity for product PR to raise the profile of processed food products and products that utilize local ingredients.
Support for development of Nagasaki MICE facilities

At Dejima Messe Nagasaki, which is being promoted by Nagasaki City as a public-private partnership, we are involved not only in supporting the overall development of the venue, but also in boosting MICE in Nagasaki through events such as the Nagasaki MICE School and Nagasaki MICE EXPO, which create new connections and opportunities. We provide support for promoting the industrialization of exchange as a market that can create business opportunities for local companies in a wide range of service industries, including tourism, lodging, food and beverage, and merchandise sales.

Digitalization support

The challenges faced by SME customers are becoming increasingly serious, such as labor shortages due to a shrinking population, lack of successors, and the need to meet diversifying customer needs. FFG launched Digitalization Support Consulting in 2019, based on the idea that it is the wish of FFG, as a presence closest to the customer, to accompany the customer and support customers’ core business. Together with our customers, we are working to solve their issues by proposing business efficiency and productivity improvement mainly through the introduction of cloud tools.

First, we focused on supporting customers who have not yet digitalized their indirect operations such as financial accounting, time and attendance management, and information sharing. In the past year, we have provided over 900 consultations at three FFG banks. We work with customers to sort out and analyze their current situation, help them formulate plans for business improvement, and work with them to resolve issues. From the second half of FY2022, we consolidated the digital solution functions that have been handled by each department into a single department to create a one-stop system that can respond to customer needs.

### Approximate 900 cases

Number of consultations from October 2021

(ffg three banks combined)
Contribute to the development and revitalization of new industries

Developing and supporting ventures

FFG Venture Business Partners (hereinafter “FVP”), the Group’s venture capital, invests in and supports mainly companies that aim to solve social issues with the latest technologies. In addition to supporting the creation of new industries that will spread from local communities to Japan and the world, we aim to accelerate open innovation that will lead to regional revitalization through matching of corporate customers and venture companies.

Collaboration with local universities

Recently we have been focusing efforts on utilizing the intellectual property of universities to help people start businesses. Through a joint research agreement with Kyushu University, we launched the FFG Incubation Program, where Kyushu University Business School students collaborate with researchers to turn business seeds into actual businesses. We also started the FFG Entrepreneurship Center, a talent development course for Nagasasi University students.

This fiscal year, 15 universities in Kyushu and Okinawa and FVP established PARKS to accelerate the creation of a startup ecosystem that strengthens the relationship between Asia and all regions of Kyushu and Okinawa.

As a track record of Kyushu University venture support, we have invested a total of more than 900 million yen in seven companies in the space, medical surgeries equipment, and other fields.

Matching business partners with venture companies

Since 2019, FVP has held the X-Tech Match Up event to match up corporate customers with venture companies, which has connected many corporate customers with venture companies. The use of venture company services has led to new business considerations and solutions to management issues for our corporate customers. In order to provide such opportunities not only at events but also on a daily basis, FVP has set up a new department this fiscal year to introduce venture companies that can help solve issues faced by our corporate customers, in constant collaboration with branch staff.
Promoting sustainability of FFG

Climate change: Initiatives addressing TCFD\* recommendations

FFG has positioned efforts for addressing climate change as an important element of its business strategy. Aiming to share easy-to-understand and useful information with its stakeholders, the Group declared in August 2020 that it supports the recommendations of the TCFD. We have also selected “risks related to climate change” as one of our top risks.

We will continue to expand the content of disclosure in line with the recommendations.

\* TCFD: Task Force on Climate-related Financial Disclosures

Governance

Under the direction and advice of the Board of Directors, the FFG head office has built an organizational structure to promote sustainability measures across the entire Group with the Corporate Planning Division as an administration division.

Sustainability Promotion Structure

- Under the above-mentioned sustainability promotion structure, we prioritize addressing climate change as a pillar of FFG’s SDGs-based focus item of “environmental protection.”

- In order to clarify FFG’s roles and responsibilities regarding the risks and opportunities of climate change, our Risk Management Policy stipulates that the Board of Directors is responsible for developing and establishing various risk management systems based on the characteristics of the climate-related risk, and action plans and other related matters are discussed by the Board of Directors or the Group Risk Management Committee, depending on the nature of the climate-related risk.

- With regard to investments and loans, our Environment and Society-Conscious Loan Policy, which takes into consideration the demands of the international community for the prevention of global warming and our expectations for the realization of sustainable local communities, is clearly stated in the Credit Policies, and decisions are made by Board of Directors.
Sustainability

**Strategies**

- The Group has recognized the following climate-related risks and opportunities based on the Group’s asset structure, business model, and possible future changes in the external environment.

### Risk Management

- The Group positions risks that are particularly important for management as top risks, and has selected “risks related to climate change” as one of them. For details, see page 52 of this report.
- Should Climate-related risks manifest, there would be ripple effects across every risk category including credit, market, liquidity, and operational risks. Our Board of Directors is actively involved in the development and establishment of proper risk management systems based on such characteristics of the climate-related risk.
- Climate-related risks that are deemed important are managed and addressed within a comprehensive risk management framework by risk category depending on how a risk is likely to manifest itself.

For example, we assess the physical risk of damage to FFG branches from storms and floods within the operational risk management framework, and appropriately control the risk by taking necessary measures such as reevaluating insurance policies.

For more information on FFG’s comprehensive risk management, see FFG Disclosure 2022*Financial Data*(Japanese only) on our website.

Sustainability

<Environment and Society-Conscious Loan Policy>

- In order to make consideration for the environment and society in our loan services, the Bank of Fukuoka, the Kumamoto Bank, and the Juhachi-Shinwa Bank have stipulated prohibited loans and loan activities that require special attention in our “Environment and Society-Conscious Loan Policy”.
- In 2022, we have made the following three revisions regarding the “coal mining” sector.
  i. Expanding the scope of the policy for coal mining business (carefully judging loans for new mining businesses) to include existing businesses
  ii. Expanding the scope of our policy on mountaintop removal mining (MTR) (prohibition of loans for new mining projects) to include existing projects
  iii. Prohibition of loans for new mining projects of fuel coal (thermal coal) for power generation projects
- The balance of loans in project finance for construction of coal-fired thermal power plants in the Group was 13.2 billion yen as of March 31, 2022, which is scheduled to become zero by FY2035.

* Please refer to our Group website for details.

Indicators and Targets

<Sustainable finance>

- In October 2021, the Group positioned finance which contributes to the resolution of environmental and social issues of our customers and the creation of a decarbonized society as “sustainable finance.” We have set the total execution amount target as “2 trillion yen from FY2020 to FY2030 (including 1 trillion yen for the environment).” Going forward, we aim to achieve targets by helping our customers resolve their issues.
- As of the end of March 2022, the total amount executed is 190 billion yen, of which 90 billion yen is for environmental finance.

<table>
<thead>
<tr>
<th>Sustainable Finance Targets</th>

</tbody>
</table>

Eligible finance

- Finance that contributes to solving environmental and social issues such as climate change
- Finance that supports and promotes customers’ ESG* and SDGs

* Acronym for Environment, Social, and Governance

<Efforts to achieve in-house carbon neutrality>

- In May 2022, we have set the Group’s CO2 emissions (Scope 1, 2) reduction target as “net zero by FY2030” in order to accelerate our local decarbonization efforts.
- In order to achieve our target, we will implement energy-saving measures such as shifting to eco-friendly stores when rebuilding stores, switching to highly efficient air conditioning, and adopting LED lighting. In addition, we will consider switching the power we are currently using to power sources derived from renewable energy.
- As one of our long-term initiatives, we will examine in-house power generation such as solar power generation, and corporate PPA.

<table>
<thead>
<tr>
<th>In-house CO2 emissions reduction target</th>
<th>FY2021 emissions results</th>
</tr>
</thead>
<tbody>
<tr>
<td>Net zero by FY2030</td>
<td>24,848 tons (Down 41% from FY2013)</td>
</tr>
</tbody>
</table>

*Applies to Scope 1 and Scope 2 of the GHG Protocol.
**CO₂ emissions**

<table>
<thead>
<tr>
<th>Measurement items</th>
<th>FY2013</th>
<th>FY2020</th>
<th>FY2021</th>
</tr>
</thead>
<tbody>
<tr>
<td>Scope 1 (direct emissions associated with the use of gas and gasoline)</td>
<td>4,447</td>
<td>2,971</td>
<td>2,862</td>
</tr>
<tr>
<td>Scope 2 (indirect emissions associated with the use of electricity, heat, and steam supplied by other companies)</td>
<td>37,484</td>
<td>24,068</td>
<td>21,986</td>
</tr>
<tr>
<td>Scope 1, 2</td>
<td>41,931</td>
<td>27,039</td>
<td>24,848</td>
</tr>
</tbody>
</table>

**About Scope 3**

- Scope 3 in the GHG Protocol refers to emissions other than those covered by Scope 1 and 2. While scope 1 and 2 covers greenhouse gases (CO₂, etc.) emitted by the reporting company itself, Scope 3 covers other companies’ greenhouse gases related to the reporting company’s business activities.
- From FY2021, the Group has calculated Scope 3 (Categories 1 to 14).
- Regarding Category 15 (investments and loans), we will consider priority sectors and efforts to reduce GHG emissions, and prepare for disclosure.

**Environmentally friendly branches**

- So far, we have been developing environmentally friendly branches, such as installing solar panels and LED lighting, mainly in new branches. In order to further accelerate this trend, we will actively consider shifting to ZEB* design branches when considering future branch rebuilding. ZEB-designed buildings can significantly reduce electricity consumption, leading to a reduction in CO₂ emissions.
- Juhachi-Shinwa Bank Hasami Branch, the first ZEB-designed store, is scheduled to open in April 2023.

*ZEB (Net Zero Energy Building)*

A building that aims to realize a comfortable indoor environment while achieving zero annual balance of primary energy consumption in the building.

* Scope 3 calculation methods, emissions figures, etc. are based on the “Basic Guidelines on Accounting for Greenhouse Gas Emissions Throughout the Supply Chain Ver. 2.4 (Ministry of the Environment and Ministry of Economy, Trade and Industry, Government of Japan, March 2022)” and “Emissions Unit Value Database for Accounting of Greenhouse Gas Emissions, etc., by Organizations Throughout the Supply Chain Ver. 3.2 (Ministry of the Environment and Ministry of Economy, Trade and Industry, Government of Japan, March 2022)” (categories 8 to 14 have calculated values of zero).
Corporate Governance

Basic Views on Corporate Governance

The Group’s management principles state the Group’s goal to become a financial group that creates value for all stakeholders, including shareholders, customers, local communities and our employees, and the Group’s basic management policy is based on the same view. Under these Group management principles, the Company, as a holding company to govern the Group, mainly consists of the core subsidiary banks, is working toward the realization of highly effective corporate governance for the purpose of optimizing the management resources of the Group and administering the Group as a whole in a sound and appropriate manner.

In addition, we have formulated the Fukuoka Financial Group Corporate Governance Guidelines¹ as our basic approach to corporate governance and its operational guidelines.

Corporate Governance System

Overview and Reasons for Adoption of Current Corporate Governance System

The Company has appointed four highly independent External Directors to fully perform supervisory functions within the Board of Directors, while the Audit & Supervisory Committee, composed of three Audit & Supervisory Committee Members, audits the status of the Directors’ job performance appropriately. In this way, a sufficiently effective governance system has been established, and therefore the current organizational design of a company with an audit & supervisory committee has been adopted.

Corporate Governance Framework

As of January 4, 2023

---

**Board of Directors, Directors (held 13 meetings in FY2021)**

The Board of Directors consists of 12 Directors (including 4 External Directors), and shall make decision on basic guidelines related to Group management, as well as matters stipulated by laws, ordinances and the Articles of Incorporation. The Board shall also make decisions on important matters concerning business management of subsidiary banks, business and affairs of the Group, while overseeing the job performance of Directors and Executive Officers.

**Office of Audit & Supervisory Committee**

To fully perform the audit functions of the Audit & Supervisory Committee, staff (multiple members) are exclusively designated to support the Audit & Supervisory Committee.

**Audit & Supervisory Committee, Audit & Supervisory Committee Members (held 12 meetings in FY2021)**

The Audit & Supervisory Committee consists of three Audit & Supervisory Committee Members (including two External Directors), and based on the basic policies and audit plan for the Group-wide audit, shall audit Directors’ job performance and examine the status, etc., of business conditions and assets of the Group as a whole.

Subsidiaries

- FUKUOKA BANK
- KUMAMOTO BANK
- JUHACHI-SHINWA BANK
- Minna Bank

---
Group Nominating Advisory Committee, Group Compensation Advisory Committee

To enhance transparency and fairness of our group management, the Group Nominating Advisory Committee and Group Compensation Advisory Committee, an advisory body to the Board of Directors, shall discuss matters related to the election/dismissal and the compensation of Directors.

Group Nominating Advisory Committee
Chairperson: Takashige Shibato (Director & Chairman)
Members: Hisashi Goto (Director & President)
Masahiko Fukasawa (External Director)
Toshiya Kosugi (External Director)
Hideo Yamada (External Director)
Nobuko Ishibashi (External Director)

Group Compensation Advisory Committee
Chairperson: Masahiko Fukasawa (External Director)
Members: Takashige Shibato (Director & Chairman)
Hisashi Goto (Director & President)
Toshiya Kosugi (External Director)
Hideo Yamada (External Director)
Nobuko Ishibashi (External Director)

Group Management Conference
The Group Management Conference consists of 7 Executive Directors (chaired by the President) (also attended by full-time Audit & Supervisory Committee Members), and based on basic guidelines stipulated and matters entrusted by the Board of Directors, shall discuss important matters related to business and affairs of the Group, including group management and operational planning.

Group IT Special Committee
The Group IT Special Committee consists of 7 Executive Directors and general managers of departments/offices in charge (chaired by the President) (also attended by full-time Audit & Supervisory Committee Members), and to strengthen the IT governance system of the Group as a whole, shall discuss matters related to IT strategy, system risk management, and investment in IT systems.

Group Risk Management Committee
The Group Risk Management Committee consists of 7 Executive Directors and general managers of departments/offices in charge (chaired by the President) (also attended by full-time Audit & Supervisory Committee Members), and shall discuss and report on matters related to asset portfolio management, compliance, and counter-financial crime management, in addition to carrying out discussions concerning each of the risk management systems of the Group as a whole.

Executive Officers
For quick decision-making of the Board of Directors and strengthening business execution functions, 20 Executive Officers (including 7 serving concurrently as Director) are elected and delegated the execution of business by a resolution of the Board of Directors.

- Group Nominating Advisory Committee: 67% Outside 4 persons Inside 2 persons
**Director Remuneration**

The introduction of a performance-lined compensation plan for the Company’s Directors (excluding Directors serving as Audit & Supervisory Committee Members, External Directors, and Directors who are non-residents in Japan) was approved at the 15th Annual Shareholders Meeting held on June 29, 2022, following resolution at the Board of Directors Meeting held on May 13, 2022. The plan seeks to clarify the link between Directors’ remuneration and the Group’s performance and shareholder value, raise the motivation of Directors to contribute to the medium- to long-term improvement of business performance and the growth of corporate value, and have Directors share with all shareholders the risks and returns of share price fluctuations.

---

**Policy on Determining Remuneration Amounts and Calculation Methods**

**[Basic policies]**

Compensation for Directors (excluding Directors serving as Audit & Supervisory Committee Members) of the Company shall be determined based on the “Policies on Determining Compensation for Directors, etc.” set forth in Article 10 of the Corporate Governance Guidelines within the scope of the total annual compensation for all Directors resolved at the Annual Shareholders Meeting.

- Policies on Determining Compensation for Directors, etc.—

1. A system of Compensation for Directors shall be set appropriately so that it serves as a healthy incentive for Directors and Executive Officers, which would eventually lead to the sustainable growth of the Group.

2. Compensation for Directors shall be determined in overall consideration of the roles and responsibilities of each Director and Executive Officer, in addition to considering the Company’s mid to long-term business performance and economic and social conditions.

3. The Group Compensation Advisory Committee shall, in response to the consultation from the Board of Directors, deliberate on Compensation for Directors based on the policies set forth in this Article, and the Board of Directors shall make final decisions with full respect for the Committee’s deliberation.

---

**[Specific policies based on basic policies]**

(1) Policy on determining amounts of individual compensation, etc. (excluding performance-linked compensation, etc. and non-monetary compensation, etc.), and calculation methods (including policy on determining the timing or conditions for granting compensation)

- Individual base compensation shall be paid monthly with a fixed amount.

- The Group Compensation Advisory Committee shall, in response to the consultation from the Board of Directors, deliberate on the base compensation, based on the “Policies on Determining Compensation for Directors, etc.” The Board of Directors shall respect the Committee’s deliberation and determine the officer compensation system based on the Policies on Determining Compensation for Directors, etc., and the base compensation is paid pursuant to the system.

(2) Policy on determining the details of performance-linked compensation, etc. and non-monetary compensation, etc. and calculation methods of their amounts and number of units (including policy on determining the timing or conditions for granting compensation)

- From the standpoint of clarifying management responsibility and providing an incentive to improve corporate value, the Company has decided to pay its Directors (excluding External Directors) stock compensation, which is a performance-linked compensation, in addition to base compensation. At a certain time each year, eligible Directors shall be granted points whose amounts are linked to the level of net income attributable to owners of parent posted by the Company. The Directors shall be delivered Company shares, etc. upon retiring from the positions of both the Company’s Director (including Director serving as an Audit & Supervisory Committee Member) and Executive Officer, and the number of shares to be delivered shall be determined based on the cumulative number of points granted during their terms in office.

- The Group Compensation Advisory Committee shall, in response to the consultation from the Board of Directors, deliberate on the non-monetary compensation, which is the subject performance-linked compensation, based on the “Policies on Determining Compensation for Directors, etc.” The Board of Directors shall pay the compensation in accordance with the officer compensation system decided with full respect for the Committee’s deliberation.

(3) Policy on determining the ratio of amounts of fixed compensation, performance-linked compensation, etc. and non-monetary compensation, etc. to amounts of individual compensation, etc.

- Individual compensation paid to the Directors shall be the sum of base compensation and stock compensation, which is a performance-linked compensation. The compensation system including provision on the ratio of base compensation to stock compensation, a performance-linked compensation, in individual compensation, etc. shall be set appropriately based on the “Policies on Determining Compensation for Directors, etc.” so that the system functions as a healthy incentive toward sustainable growth.

(4) Methods for determining the details of individual compensation, etc., for Directors (when delegating Directors all or part of the determination of the details of individual compensation, etc., their names, positions, responsibilities, and the details of the authority to be delegated shall be included)

- The Group Compensation Advisory Committee shall, in response to the consultation from the Board of Directors, deliberate on the details of individual compensation, etc. for Directors, based on the “Policies on Determining Compensation for Directors, etc.” The Board of Directors shall respect the Committee’s deliberation and determine the officer compensation system, and the details of individual compensation, etc. for Directors based on the system.

- Of the individual compensation, etc. for Directors, the base compensation for External Directors shall also be deliberated by the Group Compensation Advisory Committee in response to the consultation from the Board of Directors, and based on the “Policies on Determining Compensation for Directors, etc.” However, the Board of Directors shall delegate to the Chairman the responsibility to make final decisions on the specific details of the individual compensation, etc. with full respect for the Committee’s deliberation, and the Chairman who has received such delegation shall make final decisions.

---

*In the event that certain conditions (such as misconduct) stipulated by the Company are met, or in similar cases, the Company will not deliver shares, etc. of the Company, or will require the return of the amount equivalent to the delivery of shares, etc. already delivered (malus clause and clawback clause).*
In terms of compensation for the Company’s Directors (excluding Directors serving as Audit & Supervisory Committee Members), the maximum amount of total annual remuneration for all Directors is set based on resolution by a shareholders meeting. At the 15th Annual Shareholders Meeting held on June 29, 2022, it was resolved that (1) the total annual remuneration be within 220 million yen in monetary compensation (including up to 24 million yen annually for External Directors), and (2) the amount of money to be contributed to the stock compensation program be within 80 million yen per fiscal year.

In terms of compensation for the Company’s Directors serving as Audit & Supervisory Committee Members, the maximum amount of total monthly remuneration for all such Directors is set based on resolution by a shareholders meeting. At the 13th Annual Shareholders Meeting held on June 26, 2020, it was resolved that the total monthly remuneration be within 6 million yen (within 72 million yen annualized).

The Group Compensation Advisory Committee, in response to the consultation from the Board of Directors, deliberates on individual compensation for Directors (excluding Directors serving as Audit & Supervisory Committee Members) based on the “Policies on Determining Compensation for Directors, etc.”, and the Board of Directors makes the final decision with full respect for the Committee’s deliberation. The individual compensation for Directors serving as Audit & Supervisory Committee Members is determined based on discussions by the Audit & Supervisory Committee.

### Evaluation of Effectiveness of the Board of Directors in FY2021 (Summary)

The Board of Directors of the Company analyzes and evaluates the effectiveness of the Board as a whole on an annual basis, and regularly discloses the summary of the evaluation.

The method and results of evaluation of the effectiveness of the Board of Directors as a whole for FY2021 are as follows.

#### [Evaluation method]

The evaluation of the Board of Directors was implemented by following the method (procedures) described below.

1. Conducted a questionnaire to evaluate the effectiveness of the Board of Directors with Directors and Executive Officers;
2. Additionally conducted interviews with External Directors to collect a wider range of opinions; and
3. Based on the results of i) and ii), analyzed and evaluated the effectiveness of the Board of Directors as a whole, and implemented sharing of awareness on issues, discussions on improvement measures, etc.

The evaluation method in general and the details of the questionnaire were decided based on a review from the objective perspective of external experts.

#### [Evaluation results (summary)]

1. Overall evaluation
   - We verified that the Board of Directors was properly operated pursuant to the Corporate Governance Guidelines and that the effectiveness of the Board of Directors as a whole is ensured.

2. Update on improvement measures on issues pointed out in the evaluations in the prior years
   - Based on the issues pointed out in previous effectiveness evaluations, and in light of the rapidly changing business environment driven by technological evolution and heightening awareness regarding SDGs, the Board of Directors sought to engage in thorough discussions on the Company’s medium- to long-term risks and business opportunities. With regard to such discussions, numerous opportunities for official and unofficial exchange of opinions have been provided with a view to making better use of the insight of Executive Directors. The divisions tasked with business execution have also worked to better provide explanation and information so as to encourage active discussions among the Directors.
   - Following these discussions, we have set forth a new long-term vision toward the year 2030, which embodies our aim to become “the Best Regional Bank that contributes to the growth of all stakeholders through finance and consulting.” The current fiscal year marks the start of our Seventh Mid-Term Management Plan positioned as the first medium-term plan toward fulfilling this vision.

3. Sharing of awareness on issues and improvement measures
   - We have shared an awareness on the need to work on improving the quality of discussions more than ever to accomplish corporate value enhancement in the medium to long term. From the standpoint of allowing the Executive Directors to share their insight even further, we confirmed that we will work on clarifying the points at issue in the discussions as well as improving the quality of information and explanation being provided.
   - In new areas that are not extensions of the existing businesses, we confirmed the need to consider the risks in advance and be prepared to respond flexibly to rapid changes in the environment.

For more information on our corporate governance, please refer to the Corporate Governance Report available at the following website.

Interview with External Director

I hope to hold deeper discussions for the future by raising a wide range of issues and making proposals, while working together to pave the way for FFG to aim for further growth in this era of change.

External Director
Masahiko Fukasawa
Managing Director,
AlixPartners Asia LLC

Reform of Management System and Evolution of Corporate Governance

Since FY2022, we have welcomed a new president and started a new management system. In the process of appointing the new president, we gave priority to objectivity and transparency, exchanged opinions with the management team and External Directors, invited evaluation from outside the company, and took a start in a full-scale manner while taking into consideration past achievements.

FFG is a company with an open atmosphere. When an External Director points out an issue, it is immediately shared widely within the company. In addition, when major changes are expected, the Board of Directors evaluates their impact as opportunities and risks and then discusses the appropriateness of strategies. As External Directors, we communicate our candid opinions so that discussions do not turn inward, therefore I feel that the company has strong insights and responds in a timely manner.

During my six years serving as an External Director, I have felt that FFG’s corporate governance has evolved. At first, discussions at Board of Directors meetings were totally about “things that must be discussed.” But now I have the impression that the scope of discussion has expanded to include “things we want to discuss for the future or just in case,” and discussions are becoming more active.

Looking to the future, one of the things I would like to discuss at the Board of Directors meetings is the “necessity of business portfolio management.” Until now, FFG has focused on three banks, namely Fukuoka, Kumamoto, and Juhachi-Shinwa, when disseminating information. Now, in addition to the traditional banking business of these three banks, we are strategically expanding our business areas by establishing Minna Bank and other subsidiaries. Will these businesses be considered as part of the banking business, or will they be developed as separate businesses by FFG in the future? I believe that we will be able to find the direction to guide FFG through business portfolio management, which visualizes the businesses through profit and growth management, human resource planning, risk management, and investment planning according to the stage and characteristics of the businesses. This is an important issue to consider for FFG, which has become a group with multiple businesses. As I have carefully explained the necessity of this two or three times, I feel I am gradually gaining understanding. Examination by the Board of Directors has just started, so I would like to engage in deeper discussions going forward.

“Long-term Vision 2030” and Challenges to Achieve

FFG has formulated the “Long-term Vision 2030” with FY2022 as the starting year. The long-term vision incorporates FFG’s raison d’être and the thoughts of management as discussed at the Board of Directors meetings.

I think that setting 2030 as the target year secures a sufficiently effective time frame for taking on various challenges. This is a time frame conscious of quick execution while looking ahead to the challenges that require time to achieve, such as strengthening our management capabilities and foundations, reforming our organizational culture, developing next-generation leaders, and bringing new businesses and alliances to fruition.
FFG is an organization with an extremely strong ability to accomplish whatever it has decided to do. On the other hand, it is true that there is a gap between the organization we want to be and the organization we actually are. We need to take this fact seriously and implement measures to fill the gap, while at the same time strengthening our ability to overcome rough seas and always do what we say we will do. Specifically, I see the following four challenges.

(1) Changing our organizational culture
It is important to align our organization’s vision (what we say) with our day-to-day operations (what we do), so that employees can understand why we are doing what we are doing. In addition, I think there is room for improvement in terms of whether the FFG workplace is an aspirational option for those who are thinking about finding a job or changing jobs, and whether the environment is optimal and attractive for employees to develop their careers.

(2) Human resource development
Our stable growth to date has been achieved thanks to our outstanding leaders. If we can develop the next generation of leaders from among those employees who matured in such an environment to move forward with the next challenge, and show Group employees how these leaders shine, it will lead to further growth. To achieve FFG’s goal of “developing autonomous human resources,” it is important that those who are in management and higher positions practice and embody this idea, even more than the younger generation. Measures are also being taken to raise awareness among people of all ages, and I hope that they will serve as a driving force for reforms affecting people and organizations.

(3) Grow through learning outside the company
FFG has grown successfully by incorporating external knowledge, as practiced by iBank Marketing, Minna Bank, Sustainable Scale, and FFG Succession. In the future, we expect that there will be more situations in which we will work closely with external parties. We must feedback the know-how and work styles that will be newly established through this collaboration to conventional banks in order to change them.

(4) Preparing for the stormy waves of unpredictable environmental changes
The greatest difficulty in executing our strategies is that we have entered an era in which unpredictable environmental changes constantly occur. Even for FFG, which has a very strong ability to achieve its goals, it will be more difficult than ever to continue growing while coping with the turmoil. Through digital transformation and human resource strategies, we have been working to create an organization that responds flexibly and quickly, but this is an important issue that requires a dramatic increase in crisis awareness and response speed.

As an External Director, I would like to work with FFG to pave the way for growth, even in this era of accelerating environmental change, by conveying objective opinions and raising important issues.
Financial institutions receive profits in exchange for taking on various risks that arise from businesses, etc., including credit risk on loans and market risk on securities investment.

FFG defines the types and amount of risk taken on voluntarily with the aim of achieving management goals as “Risk appetite.” With this risk appetite as the starting point, we introduced the “Risk Appetite Framework” to conduct business management and risk management.

Through establishing the Risk Appetite Framework, our stance towards risk-taking is clarified, which enables FFG to pursue more opportunities for profit, and to conduct more appropriate risk control.

### Risk Appetite Policy

FFG specifies strategies regarding risk-taking in the risk appetite policy and defines “risks to take and risks to avoid.”

The risk appetite policy consists of “Fundamental principle,” which specifies the fundamental principle for risk-taking in each risk category, and “Risk Appetite (qualitative and quantitative),” which specifies specific risk-taking methods and the quantitative levels thereof.

There are seven risk categories in the risk appetite policy comprising “Compliance risk” and “ESG risk” added to the five comprehensive risk management categories.

*Refers to: 1) Comprehensive risk, 2) Market risk, 3) Credit risk, 4) Liquidity risk, 5) Operational risk
For more information on the comprehensive risk management framework and each risk category, please refer to “Risk Management” section of this report.

### Policy on Allowance for Loan Losses

FFG takes out allowances in a forward-looking manner (“forward-looking allowances”) by quantifying future risks using wide range of information on the current and future circumstances and reflecting this on our allowance for loan losses while taking our loan policies and portfolio into account.

A “forward-looking allowance” strengthens our preparedness for future uncertainty by calculating allowances based on economic predictions, which allows FFG to operate loans without being too impacted by economic fluctuations, and leads to stable and appropriate financial intermediary functions including cash management support.

FFG specifically estimates “forward-looking allowances” by considering the need to group allowances based on criteria such as industry types and company size while taking the analysis of our credit portfolio into consideration. Next, FFG analyzes the possibility of risk events that might aggravate the domestic or international economic environment, and considers the future economic scenario. Under the “Policy on Allowance for Loan Losses,” FFG reviews the necessity for grouping and the economic scenario every half year, in principle.

The “Policy on Allowance for Loan Losses” has been formulated within the Risk Appetite Framework, and FFG has established a structure to maintain the soundness of capital and allowance together to cover latent credit risks that may actualize in the event of future economic deterioration.
Stress Tests

Amid drastic changes in the external environment surrounding financial institutions, FFG positions stress tests as an effective method of evaluating the sustainability of its business model. FFG conducts multiple types of stress tests, striving to strengthen its responsiveness to each type of risk. Specifically, through multiple stress scenarios that reflect deteriorating risks including credit risk and market risk that may arise in the future, FFG verifies the appropriateness of its management plans and risk appetite. Through scenarios that refer to extremely large market fluctuations, etc. in the past, FFG verifies the adequacy of regulatory capital and economic capital under stress situations.

Strategy Risk Assessment

In the business environment surrounding financial institutions changing acceleratingly due to the declining birthrate and aging population, and new entrants from other sectors fueled by digitalization, FFG is expanding new initiatives such as digital transformation (DX) as well, therefore strategy risks are rising in importance. FFG defines strategy risk as a “risk of business misjudgments and lack of adaptability to environmental changes affecting financial and business stability,” and assesses strategy risks under the Risk Appetite Framework. Specifically, strategy risks are classified and assessed taking a certain method, and in particular, those that are quantifiable are reflected in the capital adequacy assessment.

Risk Indicator Management

Among potentially significant risks identified, FFG conducts risk indicator management on risks for which quantitative analysis is possible and that have a material impact on FFG. Specifically, utilizing risk heat maps, etc. which comprise various quantitative indicators such as production and employment-related indices and expected inflation rate, FFG conducts initiatives to capture indicators of risk actualization in the future. The aims of risk indicator management are: “to swiftly recognize a heightened level of a potentially significant risk for FFG” and “to discuss and implement specific countermeasures at an early stage for risks where the possibility of actualization is high and the impact is large, so as to keep the impact on FFG to a minimum.”
The Group defines risks that are particularly important for management as “top risks,” which are selected by the Board of Directors. We share awareness regarding top risks within the Group, and take measures to prevent them from materializing, as well as reduce their impact. By doing so, we are working to strengthen risk governance.

<table>

<tr>
<td>Rapid development of digital society</td>
<td>• Damage to our existing earnings base due to the advancement of technology such as WEB3.0, or the emergence of innovative financial services run by platformers and other industries</td>
</tr>
</tbody>
</table>
| System failure and cyber security                                         | • Loss of credibility due to large-scale system failures which disadvantage business partners  
• Loss of credibility due to customer information being leaked or continuity of operations being hindered because of a cyberattack  |
| Risks associated with growth strategies                                   | • Difficulty in securing the quality and quantity of human resources required to carry out growth strategies and advanced/specialized operations  
• Increase in losses due to errors assessing the success or failure of business investment in new strategies and the decision to continue investment |
| Destabilization of Japanese and international financial markets           | • Decline of net interest income due to the continued low interest policy in Japan  
• Deterioration of gains/losses from securities due to the prolonged monetary tightening in the U.S. and the global economic recession |
| Risks related to climate change                                           | • Decrease in corporate value of the Company and customers due to the delay in climate change-related disclosure and decarbonization support for customers  
• Damage to the Company, officers and employees, and business partners due to natural disasters such as earthquakes and heavy rains. |
| Acceleration of depopulation, shrinking birthrate, and aging of society in provincial areas | • Decreased business scale due to the decline of the regional economy and the increase in closure of customers’ businesses as population decline and aging progress at a faster pace than expected in business areas of the Group |
| Compliance risks                                                          | • Loss of credibility due to acts that violate laws and regulations or deviate from social norms  
• Loss of credibility resulting from the Group’s products being misused for financial crimes due to an inadequate management system for money laundering, etc. |
| External risks that can change assumptions regarding the social environment| • Significant impact on management strategy resulting from significant changes in the social environment and business assumptions due to a serious epidemic of an infectious disease or the division of the international community due to the emergence of geopolitical risks |
Risk Management

Approach to Risk Management

Due to changes in society such as evolution of technology and growing awareness of SDGs, have faced the challenges of managing risks. FFG has implemented risk management measures that take into account the diverse and complex risks that the Group faces.

FFG, in so far as is possible, applies a uniform yardstick to quantify the diverse risks that arise in the pursuit of its business and, based on comprehensive understanding, aims for management that strikes a balance between maintaining soundness and raising profitability. This is implemented groupwide through the FFG’s risk management measures.

Risk Classifications and Definitions

In so far as is possible, FFG exhaustively deals with risks arising in the execution of its business activities. We differentiate these risks into the following classifications, which we manage in accordance with their respective risk characteristics.

Furthermore, for more effective implementation we carry out ongoing revisions to each risk management method in tune with advances in risk quantification technologies and other developments.

</tbody>
</table>
The Risk Management System for FFG and the Group’s Banks

FFG has established the Group Risk Management Committee, comprising the holding company and Group banks, to monitor the various risks that the Group faces and to deliberate on risk management measures and policies attuned to changes in the internal and external environments.

In addition, Group banks have founded similar risk management systems that carry out comprehensive risk management for the Group in close cooperation with FFG.

FFG’s Risk Management Framework

About Comprehensive Risk Management

Comprehensive risk management makes an integrated assessment of risks that financial institutions face, evaluated for each risk category, by comparison with that financial institution’s capital. Categories include credit risk, market risk and operational risk, as well as credit-concentration risk and interest rate risk on bank accounts, which are not considered in the calculation of the regulatory capital adequacy ratio.

FFG operates a policy of “establishing and upgrading appropriate comprehensive risk management frameworks that grasp the risk profiles of banks, as the business of financial institutions becomes more diverse and complex, in order to raise efficiency and profitability through the effective use of capital, while maintaining the soundness and appropriateness of banks.” Based on this policy, FFG is deploying such universal yardsticks as VaR to measure various risks and, after calculating a total value, carries out comprehensive risk management by comparison with FFG’s consolidated capital.

Risk Capital Allocation System

FFG has introduced a risk capital allocation system within the framework of its comprehensive risk management. Specifically, FFG assesses its capital allocation on the basis of FFG consolidated capital (Core capital), maintaining the remainder as a buffer against risks that are difficult to measure. Capital allocation is applied to each Group bank and the usage is monitored and managed on a monthly basis.
Credit risk is the risk of losses arising from asset values (including off-balance-sheet assets) that have fallen or been erased by the worsening financial position of obligors.

This is the main risk category incurred by the Group. In order to post appropriate profits and maintain soundness of assets, credit risk management is one of the most important issues in bank management.

With regard to credit risk management, FFG is developing its management along the lines of a multi-brand single platform while employing the same common rating systems, screening procedures and credit portfolio management procedures across FFG.

FFG’s basic policy on groupwide credit risk management is set out in its Risk Management Policy, which forms the basis for a Credit Policy for each Group bank. This policy indicates a basic approach covering the judgment and behavior for the appropriate operation of credit businesses.

FFG has also created the Credit Risk Management Program as an action plan for enhancing the groupwide credit risk management framework and strengthening groupwide credit portfolio operations.

Credit Risk Management

FFG has also created the Credit Risk Management Program as an action plan for enhancing the groupwide credit risk management framework and strengthening groupwide credit portfolio operations.

Credit Risk Management System

The Credit Risk Management System is centered on the Risk Management Division, which administers the formulation of credit risk management policy and manages the rating systems and credit risk for the Group.

Screening for individual loan applications is conducted by the credit supervision departments of each Group bank and rating assessments based on the credit ratings system are chiefly conducted by the Credit Supervision Division, FFG’s rating assessment department, in conjunction with business offices of each Group bank. FFG’s Risk Administration Division handles Group-level management of obligors’ dealings with banks within the Group.

FFG’s Internal Audit Division audits the soundness of asset content, and the appropriateness of credit risk management conditions from a standpoint independent from each Group bank. The division reports its findings to FFG’s Board of Directors. The audit departments of each Group bank receive audit reports from the FFG’s Internal Audit Division and report the audit results to the respective boards of directors.

Risk Management

Obligor Ratings

Obligor ratings express the certainty that an obligor will fulfill its obligations, so are assigned to business corporations based on the scoring of their financial condition and qualitative assessments by bankers who have undergone specialized training. The ratings are reviewed periodically—at least once a year and whenever an obligor’s credit status changes—to enable the timely ascertainment of the conditions of individual obligors and portfolios.

In addition, obligor ratings are linked to obligor and loan categories based on laws and regulations and are also used in self-assessments, write-offs and loan loss provisions. Accordingly, obligator ratings are ranked as the core of credit risk management.

Quantification of Credit Risk

FFG quantifies credit risk based on an internal rating system centered on obligor ratings to rationally ascertain credit risk and ensure efficient application of the capital policy and credit criteria. We allocate risk capital and manage our credit portfolio on the basis of the results of these calculations.

Framework for Individual Credit Management

In adopting individual loan applications, FFG conducts analysis and assessment from a broad perspective and strives to make precise, rigorous credit judgments by verifying the reasonableness of credit preservation through collateral.

Even after extending credit, we engage in preventive management before loans become delinquent and work to swiftly and appropriately respond at such time, through follow-up management that includes periodically reviewing the obligor’s business situation, re-assessing its collateral and strengthening management of overdue accounts.
Market Risk Management

FFG’s Board of Directors has established a basic policy on market risk management. In light of this basic policy, the Group Risk Management Committee has determined a management policy for market risk, including ALM, as a system for controlling risk groupwide by monitoring the status of policy implementation and risk.

Moreover, FFG’s Risk Management Division ascertains and analyzes the market risk conditions and status of market risk management of the Group, based on reporting from the market risk administration divisions of the Group banks. The Group’s Risk Management Division provides a framework for advising the market risk administration divisions of the Group banks on risk management arrangements and periodically reporting to the Board of Directors.

Specifically, the division manages market risk by considering the risk profiles of the Group banks and monitoring the implementation status of various risk limits set by aligning them with risk capital apportioned to the banks. The trading and banking divisions use the common yardstick of VaR for setting such limits on risk.

Note: VaR is the largest loss likely to be suffered on a portfolio position with a given probability.

Liquidity Risk Management

The Board of Directors of the Group has instituted a basic policy on liquidity risk management in the recognition that downplaying liquidity risk could lead to serious problems of business failure and, in turn, the systemic risk of a chain reaction of defaults by financial institutions. In light of this basic policy, the Group’s Risk Management Committee has determined a liquidity risk management policy following consultations with the ALM committees of the Group banks, which forms a framework for controlling risk across the Group by monitoring the status of policy implementation and risk conditions.

Furthermore, the Group’s Risk Administration Division ascertains and analyzes the Group’s liquidity risk situation and the status of liquidity risk management, based on reporting from the liquidity risk administration divisions of the Group banks. The Group’s Risk Administration Division forms a framework for advising the liquidity risk administration divisions of the Group banks on risk management arrangements and periodically reports to the Board of Directors.

Specifically, the division manages liquidity risk by determining management categories according to the status of cash flow at the Group banks, actions to be taken for each category and limits for each type of risk associated with cash flow in consideration of the banks’ risk profiles.

Operational Risk Management

Operational risk refers to risks associated with inadequacies in the Group’s internal business processes, mistakes by officers or regular employees, and system failures, as well as losses attributable to such external factors as disasters. Operational risk is managed by classification into administrative risk, system risk, tangible assets risk, labor risk, legal risk and reputational risk.

There are drastic changes in the operating environment surrounding FFG such as products and services diversifying due to the expansion of business domains and the progress of digitalization, rising importance of cyber security and information management, etc., and the frequent occurrence of natural disasters. Operational risk management is becoming increasingly important in responding to such changes and building a framework for preventive risk management.

The Board of Directors of the Group maintains organizational frameworks and mechanisms for appropriate management of operational risk. By establishing Operational Risk Management Rules, which stipulate basic regulations for forestalling the manifestation of risks and minimizing the impact in the event of occurrence, and the Operational Risk Management Program, which specifies priority action items for each fiscal year, the Group comprehensively manages operational risk.

In addition, to appropriately designate, assess, understand, manage, and reduce operational risk, we collect and analyze related loss information for realized risks, and for potential risks we use risk and control self-assessments (RCSA: self-assessment on risk and the effectiveness of risk control) to implement appropriate countermeasures. The Group also monitors and controls operational risk in an appropriate and timely manner through the Board of Directors and the Operational Risk Management Committee.
The Group believes that “compliance” is one of the most important management issues for financial institutions, for which trust is the greatest asset. We are working to establish corporate ethics and enhance and strengthen our compliance system.

The Group and all officers and employees shall comply with the letter and the spirit of our Compliance Charter*, which shows the compliance-related basic values, spirit, and code of conduct in common among Group companies, and conduct daily business with high ethical standards.

Compliance Framework

We have established the position of Chief Compliance Officer (CCO) as the officer in charge of building and operating compliance systems for the entire Group, as well as the Quality Administration Division Compliance Group as the department that oversees compliance.

Furthermore, we have established the Compliance Committee, comprised of the President, Directors, and other members, who discuss and report on important matters related to compliance, and periodically evaluate and check the progress of the Compliance Program.

Each company in the Group has also established a compliance administration division, and they are working together with the Company to enhance and strengthen the compliance system throughout the Group.

Basic Views

The Group believes that “compliance” is one of the most important management issues for financial institutions, for which trust is the greatest asset. We are working to establish corporate ethics and enhance and strengthen our compliance system.

The Group and all officers and employees shall comply with the letter and the spirit of our Compliance Charter*, which shows the compliance-related basic values, spirit, and code of conduct in common among Group companies, and conduct daily business with high ethical standards.

Compliance Framework

We have established the position of Chief Compliance Officer (CCO) as the officer in charge of building and operating compliance systems for the entire Group, as well as the Quality Administration Division Compliance Group as the department that oversees compliance.

Furthermore, we have established the Compliance Committee, comprised of the President, Directors, and other members, who discuss and report on important matters related to compliance, and periodically evaluate and check the progress of the Compliance Program.

Each company in the Group has also established a compliance administration division, and they are working together with the Company to enhance and strengthen the compliance system throughout the Group.
In order to quickly grasp the expectations of a changing society and take sincere action towards that society, it is important to maintain the perspective of asking “Are there any discrepancies between the common sense of society and the common sense of FFG?” and “Are we thinking from the customer’s perspective?” We place great importance on this perspective when planning in-house training sessions and responding to consultations from departments and sales offices.

Initiatives to Enhance and Strengthen Our Compliance System

The Group has established a Compliance Charter, as well as a Compliance Manual that compiles our ethical provisions, in-house regulations, and laws and other pertinent ordinances. We also establish a Compliance Program for each fiscal year as a practical plan for priority issues and action plans related to compliance.

Our main measures for the current fiscal year are to further raise the level of our corporate culture that emphasizes compliance, enhance the anti-money laundering management system, and strengthen the customer protection management structure. We are implementing various initiatives such as sending messages from management, holding regular workplace training sessions, and checking compliance on an individual and workplace basis.

Whistleblowing System and Other Initiatives for the Early Discovery and Correction of Misconduct

FFG has set up a whistleblowing system called the Whistleblowing Hotline for the early detection and correction of acts such as violations of laws and ordinances, or violations of employment rules. Not only an internal contact point, but also an external contact point in a law office has been established in order to ensure confidentiality.

In addition, we have established a variety of systems that allow employees to report and consult with the Human Resources department or supervisors about anything so that troubles, concerns, etc. can be gathered more broadly and addressed early. In order to promote awareness of these systems, we have placed posters with a focus on the user’s perspective throughout the company. Also, by making it possible for officers and employees to check contact information from their smartphones, we convey the sense of security and the convenience of our reporting and consultation systems.

Anti-bribery and Anti-corruption Initiatives

With regard to our efforts to prevent bribery and corruption, we have clearly stated FFG’s approach and specific responses in the Compliance Manual, and we are thoroughly spreading this knowledge to all officers and employees.
Compliance Measures

Anti-Money Laundering and Countering the Financing of Terrorism

In recent years, a variety of financial crimes such as fraud, illegal cash withdrawal, money laundering and financing of terrorism have occurred, and their schemes and techniques have become more complex and sophisticated. FFG and its Group companies have established the Policy on Anti-Money Laundering and Countering the Financing of Terrorism to fight such financial crimes, and are taking various measures to protect customers’ assets.

<Outline of FFG’s Measures for Anti-Money Laundering and Countering the Financing of Terrorism>

Global regulations
- International institutions
  - FATF
  - Basel Committee on Banking Supervision, etc.

National regulations and systems
- Act on Prevention of Transfer of Criminal Proceeds
- National Risk Assessment of Money Laundering and Terrorist Financing
- FSA Guidelines for Anti-Money Laundering and Combating the Financing of Terrorism, etc.

FFG’s countermeasures
- Risk Assessment Report
  - Risk identification
  - Risk assessment
  - Risk mitigation measures

FFG’s Main Initiatives

Establishment of the Management System
Positioning the prevention of money laundering and other financial crimes as one of the most critical issues for business management, FFG has established the Counter-Financial Crime Group under the Quality Administration Division as an administration department and works to ensure uncompromising verification and sophistication of the management system to maintain and improve public trust.

FFG regularly holds Counter-Financial Crime Committee meetings attended by the management and heads of each department in order to discuss and report measures and cases. Understanding that financial crimes such as money laundering can pose a material risk to the business, the management and heads of each department proactively take the initiative and require all employees to fully understand the countermeasures.

Revision of the Risk Assessment Report
FFG identifies and assesses the risks associated with products and services that FFG and its Group companies offer, and in order to reduce such risks, we have established a written Risk Assessment Report by a Specified Business Operator, etc. (Risk Assessment Report), which is revised at least once a year.

Employee Training
In order to build a system that prevents use by criminal organizations, we conduct training and comprehension tests. We are also striving to improve the awareness and sensitivity of all employees to financial crimes, such as by regularly disseminating methods and points to be aware of regarding financial crimes, which are becoming more sophisticated and complex.

The Group reviews the status of compliance with measures to prevent money laundering and other financial crimes, and based on the results, continuously improves the system.

Efforts to Cut Off Relationships with Anti-Social Forces

In order to maintain public trust in financial institutions and fulfill our social responsibilities, the Group is mobilizing its entire organization to cut off all relationships with anti-social forces that threaten the order and safety of civil society.

Specifically, we are working to prevent transactions with anti-social forces by introducing criminal organization exclusion clauses into our contracts and transaction agreements. In addition, if the other party is found to be an anti-social force after the start of a transaction, we will cooperate with external specialized agencies such as the police and lawyers to take measures to eliminate transactions and cut off relationships.
Shareholder Communication

Dialogue with Shareholders and Investors

FFG has defined “become a financial group that creates value for all stakeholders” as one of its Management Principles, and is actively engaged in communication with shareholders and investors.

The Group is providing explanation on FFG’s growth strategy and financial data in an easy-to-understand manner through annual shareholders meetings, briefings for investors, and other opportunities. We are also focusing on the disclosure of non-financial information in the Integrated Report.

Going forward, FFG will continue to enhance its communication with shareholders and investors, disseminate more information on FFG’s activities, and use the opinions and requests expressed in the dialogue to improve management, thus pursuing sustainable improvement of corporate value.

Enhancing Shareholder Returns

With regard to returning profits to shareholders, the Group adopts a performance-based dividend policy (dividend table) based on its aim of increasing shareholder value by enhancing corporate value. In consideration of the balance between maintenance of soundness and growth investment, we have set the target payout ratio (consolidated) of about 35% in the dividend table, and aim to pay stable dividends.

Starting in FY2022, we have changed the profit range of the dividend table from 5 billion yen to 2.5 billion yen and the dividend amount per share to 5 yen. By doing so, we have revised the system so that our profit growth can easily lead to increased dividends for investors.

<table>
<thead>
<tr>
<th>Dividends per share (yen)</th>
</tr>
</thead>
<tbody>
<tr>
<td>FY07</td>
</tr>
<tr>
<td>35</td>
</tr>

</tr>
</tbody>
</table>

*A one-for-five reverse stock split of our common stock was conducted on October 1, 2018 as the effective date.

The above figures are calculated by recalculating dividends before September 2018 on a post-reverse stock split basis.
